## Other AI tools

We are currently conducting market research for potential subscriptions to ChatGPT Edu from OpenAI, Claude from Anthropic, or Google Gemini. Until the research is complete, we recommend faculties and employees use team subscriptions, i.e., ChatGPT Team or Claude Team. For team subscriptions, suppliers usually commit not to train their models on uploaded data and may offer additional benefits such as assistant sharing, etc. Please always review the terms and conditions.

Individual faculties and basic units may provide additional tools. For more information, we recommend contacting your faculty.
