

Generative AI Tools at CUNI

Below you will find the updated list of available AI tools at CUNI. If you are thinking of using a different one for work, education or research and you are not sure about the safety of it, please contact the [Generative AI Team](#). Read also our Statement about Chat GPT Edu and similar below as well as the [Recommendations from Charles University's management for the safe use of AI tools](#).

General Use AI Tools

	<p>Microsoft Copilot for Education</p> <p>Chatbot in a web browser (works best in Microsoft Edge). It can generate text, images, and computer code as well as basic translations.</p> <p>Availability</p> <p>Available at office365.cuni.cz for all employees and students of Charles university. More info here.</p> <p>Data protection</p> <p> After logging in with your CAS credentials you can enter public, internal or protected data. Enter data only to the extent necessary.</p>
--	--

Specialised Tools

	<p>Microsoft 365 Copilot</p> <p>AI assistant integrated into Microsoft 365 products (for example Word or Excel).</p> <p>Availability</p> <p>The license is available for employees of Charles University, not for students. The cost is approximately 500 CZK per month (depending on the current USD exchange rate and Microsoft's pricing).</p> <p>To obtain a license, please contact your faculty's M365 Office administrator.</p> <p>Data protection</p>

	 <p>After logging in with your CAS credentials you can enter public, internal or protected data. Enter data only to the extent necessary.</p>
	<p>Grammarly</p> <p>A digital tool for checking English spelling that uses artificial intelligence and natural language processing.</p> <p>Availability</p> <p>Licenses are provided based on requests from students or employees of Charles University, and the assigned licenses are recorded as library loans. Currently, Charles University has 895 licenses available, which can be used by registered readers through the central search engine UKAŽ. More info here.</p> <p>Data protection</p>  <p>You can only enter public data.</p>
	<p>Writefull</p> <p>Nástroj pro akademické psaní, který poskytuje pokročilou korekturu textů v angličtině. Existuje jako webová verze, webová aplikace nebo doplněk do MS Word.</p> <p>Availability</p> <p>Pro přístup k Writefull for Word potřebujete univerzitní e-mailovou adresu ve tvaru xxx@domena.cuni.cz nebo xxx@cerge-ei.cz. Návod, jak se k nástroji dostanete, najdete zde.</p> <p>Data protection</p>  <p>You can only enter public data.</p>
	<p>Oxford English Dictionary AI assistant</p> <p>AI Assistant for the Oxford English Dictionary. It allows for more precise searches and helps find the most relevant information for users, making searches easier and more accessible."</p> <p>Availability</p> <p>Oxford English Dictionary is accessible for Charles University here. (In the Availability section, click on Charles University).</p>

	<p>In the top right corner, you will find the AI research assistant.</p> <p>Data protection</p>  <p>You can only enter public data.</p>

Developer Tools

	<p>GitHub Copilot (for academics and students)</p> <p>GitHub Copilot is an AI-powered coding assistant that helps programmers write code more efficiently. It integrates with popular code editors and provides real-time code suggestions, auto-completion, and even entire code snippets based on the context you are working in.</p> <p>Availability</p> <p>GitHub Copilot is available for free only to students and educators at Cuni (not for administrative staff).</p> <p>Sign in here/Create a personal account .After creating a personal (free) account, you will be prompted at the bottom of the page to submit an application, where you will need to enter the name of your university. Sign in using your university email address.</p> <p>Data protection</p>  <p>You can only enter public data.</p>
	<p>GitHub Copilot (for administrative staff)</p> <p>Availability</p> <p>Technical and administrative staff are not covered by the EDU license, and unfortunately GitHub does not provide free access to this tool. A license can be obtained in one of the following two ways:</p> <p>Purchase a Pro license for an individual</p> <p>The license is available for roughly 200CZK per month (excluding VAT), depending on the current USD exchange rate and Microsoft's price list.</p> <p>Note: This ordering method does not allow you to issue an invoice (e.g., for faculty accounting purposes).</p>

- ? [Sign up here](#)
- ? Create a personal account
- ? Activate a trial Pro license
- ? After the trial month, [purchase a Pro license here.](#)

Purchase a Business license for the institution (workplace)

Setting up an Enterprise account for the institution costs about 440?CZK per month.
 Each individual Copilot Business license under that account costs about 400?CZK per month.

Note: This ordering method does allow you to obtain an invoice (e.g., for faculty accounting purposes).

- ? Create a GitHub Enterprise account for your institution [here](#)
- ? Once the Enterprise account is active, grant Copilot Business access to the specific users.
- ? Purchase the Business licenses ([instructions here](#))

You can only enter public data.

Metacentrum Cesnet Tools

As a member of a research organization, you can apply for access to Metacentrum. This grants you access to various tools and services

[Submit an application here.](#)

The application should be available to all applicants from Charles University. Once your application is approved, you can start using tools such as:

JupyterHub

Provides users with access to shared virtual computing resources without the burden of installation and maintenance tasks. JupyterHub can be used to run various user interfaces, including Jupyter Notebook, Jupyter Lab, and RStudio, for programming in Python or R. Additionally, thanks to access to the virtual machine terminal, it allows the use of other Linux-based tools, including LLM management tools like Ollama.

Availability

You can start working with Jupyterhub [here](#).

---	--

Testujeme

	<p>OneTutor</p> <p>OneTutor allows teachers to upload teaching materials to the tool and lets students “chat” with those materials. The tool also has the ability to generate quizzes.</p> <p>Availability</p> <p>The tool is currently in a testing phase and is available only for courses of certain members of the Generative AI working group at Charles University.</p> <p>If you would like to test the tool or learn more about it, please contact ai@cuni.cz .</p> <p>The web page for the tool can be found here.</p> <p>Data protection</p> <div data-bbox="834 1641 883 1707" style="background-color: #2e7d32; width: 20px; height: 20px; margin-bottom: 10px;"></div> <p>You can only enter public data.</p>
	<p>AI Sandbox</p> <p>AI Sandbox is a chatbot for safe interaction with various artificial intelligence models. The data you provide is not used to train these models. It enables chatting with AI models, creating simple assistant “code interpreter” bots, and running code.</p>

Availability

The application is in a pilot phase. Priority access is given to members of the working groups (Broad Working Group on Generative AI; Generative AI at Charles University; UISK Research Group). For more information, please contact ai@cuni.cz.
